~ 12 pt swing towards Republicans in Virginia

~ 13 pt swing towards Republicans in New Jersey

Guiding Question:

What is driving the swing toward Republicans in the electorate and how can Democratic candidates counteract this swing in their messaging?

Project Objective

- ★ Explore the social media messaging strategies of the candidates in the VA and NJ Gubernatorial Elections in 2021
- ★ Areas of Interest:
 - What issues are the candidates focusing on?
 - Is the candidate primarily using positive or negative messaging strategies?
 - E.g. positive message about their own candidacy vs. negative message about their opponent
 - Do the social media networks of the candidates overlap, and if so how much?

Data

- ★ Queried the Twitter API for the user timelines of each candidate from January 1, 2021-November 3, 2021 (election day)
- ★ Results: 4 datasets with ~1500-3500 unique tweets each.

- ★ *Attempted to query the API for all tweets related to the VA and NJ elections within the last year, but limited by API permissions*

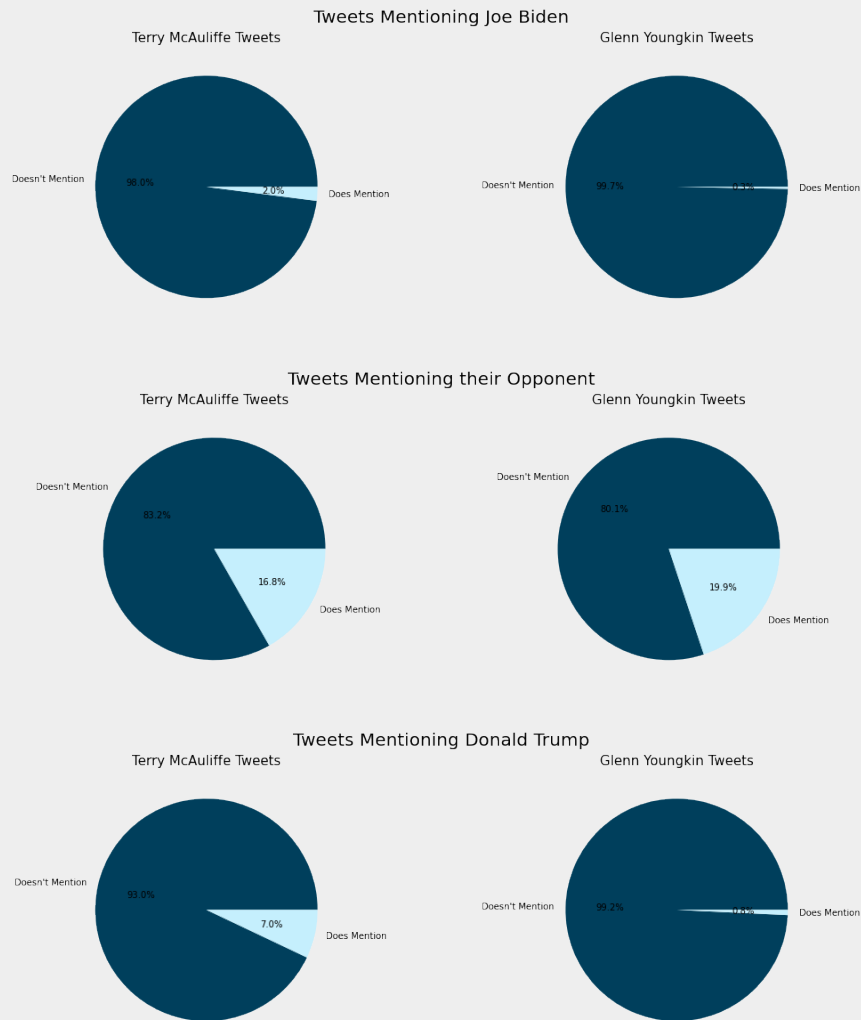

Tools and Libraries

- ★ Tweepy and Twitter API
- ★ SpaCy/SpaCyTextBlob and NLTK for language processing and sentiment analysis
- ★ sklearn for topic modeling and engagement regressions
- ★ matplotlib, seaborn for visualization
